

Subnero Underwater Network

Scalable, reliable, multifunction networks for underwater applications

AUV Network

Command, control and track teams of AUVs over large areas with transparent handovers.

Sensor Networks

Form large underwater sensor networks for both short and long term monitoring.

Diver Networks

Localize and communicate with teams of divers over large areas reliably.

End-End Connectivity

Hardware agnostic end-end connectivity from a user to underwater assets over IP networks.

Relay & Routing

Transparent relaying, routing, positioning and remote control capabilities.

Network Management

Easily manage multiple distributed or co-located underwater mobile as well as static assets.
